

ACCORD PROJECT FINANCIAL SERVICES WORKING GROUP CHARTER

1. Background

a. Description and Goals

- i. The purpose of the Accord Project Financial Services Working Group is to produce specifications and open source tools to improve the ability of financial services industry to face its challenges. Essential to this goal is to enhance the ability of a wide variety of investment, trading, and other financial contracts to dynamically reflect their surrounding conditions and risk-return profiles.

b. Potential areas of focus and issues to address:

- i. real-time incorporation of market data into financial contracts;
- ii. dynamic pricing and collateralization;
- iii. incorporation of data about conditions required to trigger payments, release funds, or restructure ownership;
- iv. decentralized clearing and settlement infrastructure for securities and derivatives;
- v. investment fund governance, reporting, and asset custody;
- vi. structure and regulation of distributed token-based sales (aka “initial coin offerings”);
- vii. regulatory capital relief transactions;
- viii. automating trade finance transactions;
- ix. integration of financing with the purchase of goods and services;
- x. incorporation of data into insurance policies for claims, adjustments, and processing;
- xi. capturing contracts in shared financial data and processing repositories;
- xii. incorporation of smart legal contracts into existing compliance frameworks and technology
